

Access Makeover Lab

This task is designed badly on purpose. Test the directions - not yourself - for only 30 seconds.

THE 30-SECOND MINI-TASK

1. Read every direction before starting.
2. Write one full paragraph naming four ways a classroom can be fair.
3. Work alone. Use pencil only. No examples.
4. Finish in 30 seconds.

CIRCLE THE PARTS THAT CREATE BARRIERS

OUR REAL CLASS TASK + LEARNING GOAL:

OUR THREE CHOICES:

ACCESS CHECK

☐ MORE PEOPLE CAN JOIN

☐ GOAL STAYED THE SAME

Teacher Quick Start: Access Makeover Lab

Do not copy this page. Open the source, model one move, then hand out only the student pages needed (1-2).

READY

One pack per group. Provide one real upcoming task, state its student-friendly learning goal, and identify only choices that are genuinely available.

MODEL ONE MOVE - ABOUT 60 SECONDS

Try the badly designed mini-task for 30 seconds. Circle 'work alone' and think aloud: 'Pairing can remove this barrier while the learning goal stays the same.'

1 RUN IT

1

Students attempt and mark the mini-task.

2

Match two tools to exact barriers.

3

Choose one option from each menu row.

4

Peer-test: goal same, access better?

DEBRIEF

Which exact barrier did each choice remove? What learning goal stayed the same? Who can participate now?

COLLECT / NOTICE

A Ways-to-Join menu attached to one real class task, plus the peer-test check.

CARE

Do not use disability simulations or require students to disclose diagnoses or supports.
